

Get the Most Out of Your Business.

Armor Development is both a professionally managed and profitable software development company based in the U.S. Our company is experienced with developing and improving hundreds of websites in various industries. Since 2010, we have built an outstanding reputation for designing and implementing professional websites by utilizing leading edge technologies. We take pride in providing exceptional customer and consulting services while meeting the needs of our clientele at an affordable price. Our core product is a content management system which provides robust solutions to all our clients. This system uses a backend management system that is designed to be easily configured to meet all our clientele's business requirements. Not only does Armor Development's content management system dynamically manage data, but it also provides clients with the ability to sell their products online with an easy to use shopping cart.

Professional Website Design

Get a professionally designed website packaged with continuous updates to keep your site both competitive and fresh.

LET US HANDLE THE TECHNOLOGY,
YOU HANDLE YOUR BUSINESS!

Quality

Armor Development will provide your business with the high quality processes and website implementation that your company deserves. Our team is composed of extremely driven and passionate experts in the field of software engineering, business, and marketing. They are completely dedicated to providing you with the results that you expect from us, and nothing less. We will work with your team personally to gain a complete understanding of your online target audience, and address all your needs and/or concerns. Your website(s) will be hosted in the cloud on dedicated servers which guarantees your site will have 99.9% up time. Armor Development stands apart from all other web development companies because we consider our clients to be a part of our team. Your satisfaction is our number one priority. If there is anything that does not satisfy you, we will work with you and your team until you are completely satisfied.

It's our mission to not only inform you about the right technology, but to also educate you on it as well. Our experienced and knowledgeable staff will provide you with a strong understanding of the various products Armor Development has to offer you. We will help find the package that is best for you and your team.

Having problems with your current website provider, or are you just looking for a fresh new look? Mention this offer and get 10% off!

DO YOU SELL PRODUCTS ON THE WEB?

If so, check out Armor Development's secure and seamless ecommerce shopping cart. We provide a high end shopping cart which will give your customers the ability to purchase products from your website with a rewarding, positive customer experience. We support credit card processing, PayPal, and more!

SEARCH ENGINE FRIENDLY

All our website designs are search engine optimized (friendly). When search engines (such as Google) add web pages to its database, they send out “crawlers”, “spiders”, or “bots” to harvest the text on your site. These bots cannot harvest elements that are created via JavaScript, or “see” images (though they do check all tags), and they do not work well with Flash components at all. This is the reason why Armor Development does not use Flash when building your site, and uses other advanced technology as a better alternative.

Pricing

When shopping around, one will find many companies which claim to offer similar services as ours, but cost several thousand dollars more. You may be wondering how we can provide these complex services at such an affordable price. Well, those companies have to build your entire web site from scratch, we don't! Armor Development utilizes existing functionality and reusable software components to rapidly build your website that is quality assured. This is how we will provide you with a maximum level of service at an extremely low cost.

WE OFFER A WIDE RANGE OF SERVICES:
